Article 24

Every child has the right to the best possible health. Governments must work to provide good quality health care, clean water, nutritious food and a clean environment so that children can stay healthy. Richer countries must help poorer countries achieve this.

Oakley Cross Primary School and Nursery Unit

School Food – Policy for Packed Lunches (brought in from home)

This policy guidance has been developed by a group of multi-agency partners involved in reducing childhood obesity, promoting the health and well-being of young people and the provision of catering services in schools.

Additional guidance and advice on providing healthy packed lunches is available from a number of sources including the School Food Trust [www.schoolfoodtrust.org.uk](http://www.schoolfoodtrust.org.uk)

As part of the Government’s approach to reducing childhood obesity, A Cross Government Strategy for England, *Healthy Weight, Healthy Lives* was launched in January 2008. This strategy outlines an expectation on all schools.

To promote a culture of healthy eating the government now expects all schools – in consultation with parents, pupils and staff to adopt whole school food policies. In particular, schools will be expected to:

- develop healthy packed lunch policies, so that those not yet taking up school lunches are also eating healthier

Durham County Council and its partners have developed this guidance document to support schools in their journey towards this goal.
Every child has the right to the best possible health. Governments must work to provide good quality health care, clean water, nutritious food and a clean environment so that children can stay healthy. Richer countries must help poorer countries achieve this.

Introduction
To grow and stay healthy children need to eat a nutritionally well-balanced diet. Schools are an influential setting and can contribute significantly to improving the health and well-being of pupils.

Good nutrition in childhood can help to prevent a variety of health problems, both in the short term and later in life. There is increasing concern that many children are consuming too much fat, sugar and salt and too little fibre, fruit and vegetables.

Packed lunches can contribute to almost a third of a child’s weekly food intake and therefore need to be balanced and nutritious.

Aim
To ensure that packed lunches (brought in from home) reflect the new standards for school meals.

Rationale:
- Schools are required to positively promote the health and well being of its pupils. Work around healthy eating is a high priority.

- The content of lunchboxes needs to reflect the requirement of schools to meet minimum food and nutrition standards for school meals.

- The contents of lunchboxes in some schools can be extremely unhealthy, recent audits of lunchboxes have shown that in the main they contain foods with high levels of fat, sugar and salt, and very few fruit and vegetables.

- To encourage healthy eating habits from an early age and improve the overall nutrition of pupils

- The short term effects of unhealthy packed lunches and food intake can include poor growth, tooth decay, obesity, anaemia, constipation, poor concentration and behavioural problems which may have an impact on a child’s learning.

- The longer term effects of a poor diet in childhood can be an increased risk of stroke, cancer, heart disease and diabetes in adulthood.
Objectives

- To improve the nutritional quality of packed lunches in schools and the eating habits of children at lunchtimes

- To develop an awareness in pupils, parents, staff and the wider community that the school takes a pro-active approach to promoting healthy eating.

- To encourage healthy eating habits in childhood that can influence health and well being in later life.

- To ensure that food brought into school (packed lunches) reflects and meets food standards for School Food.

Implementation

This packed lunch policy fits within a wider context of promoting a whole school approach to food and healthy eating.

- Children’s packed lunches should include items from the 5 main food groups;

  **Bread, Rice, Potatoes, Pasta**
  These starchy foods are a healthy source of energy. Packed lunches should include 2 or more portions eg pasta salad, sandwich.

  **Fruit and Vegetables**
  These foods provide vitamins, minerals and fibre. Lunches should include at least 1 portion of fruit and 1 portion of vegetables / salad, or more eg carrot/cucumber sticks, cherry tomatoes, a piece of fruit.

  **Milk and Dairy foods**
  These foods provide calcium for healthy bones and teeth. Include 1 portion at lunch eg yoghurt, fromage frais, milk.

  **Meat, Fish, Eggs, Beans**
  These foods provide protein for growth. Packed lunches should include 1 portion of these foods eg boiled egg as filling in sandwich, mixed bean salad.

  **Drinks** – any drinks provided in lunch boxes should only include either plain water, milk (semi-skimmed), unsweetened fresh fruit juice, diluted fresh fruit juice, fruit or dairy based smoothies.

Please see appendix 1 for Parent Friendly Guide.

Please support your school by not including these items in a packed lunch:
Every child has the right to the best possible health. Governments must work to provide good quality health care, clean water, nutritious food and a clean environment so that children can stay healthy. Richer countries must help poorer countries achieve this.

Foods and drinks high in fat and / or sugar
It is important not to fill up on too many foods that are high in fat and / or sugar at the expense of other more nutritious foods. Limiting high fat and sugar foods will help protect young people from becoming overweight as well as helping prevent tooth decay, heart disease, stroke, and diabetes. This is why sweets, chocolate, crisps, cereal bars, fruit bars, toffee/salted popcorn, squash and fizzy drinks are no longer available in schools.

Restricted items
To ensure consistency and to keep packed lunches in line with food standards for school meals, packed lunches should not contain the following:
- Fizzy / sugary drinks in cartons, bottles or cans
- Chocolate-coated products / sweets / confectionary
- Chocolate spread as a filling for sandwiches
- Chewing gum
- Sugared / toffee and salted popcorn
- Crisps or any packet savoury snacks high in salt and fat
- Salted nuts
- Energy drinks

Waste and Disposal
The school will, within reason, send any uneaten packed lunch food items back home. The rationale for this is that parents can also monitor what their child has consumed during the day and then raise any concerns over their child’s food intake with the school.

Promotion of Healthy Packed Lunches
There will be ongoing promotion of the need to provide healthy packed lunches through:
- Pupil, parent / carers newsletters
- School prospectus / brochure
- Whole School / Packed Lunch Policy
- Health weeks / healthy eating activities
- Curriculum content
- Parents evenings / parent consultations
- Discussion through School Nutrition Action Group (SNAG)
- School website
- Reward schemes
- Workshops for parents
- School involvement in National Healthy Schools Programme
- ‘Pack A Punch In Your Lunch’ guide to healthy packed lunches.

Packed Lunch Containers
It is the responsibility of the parents / carers to provide an appropriate packed lunch container where food items can be stored securely and appropriately until the lunchtime period. Parents are advised to include an ice pack. Food
products prepared and stored in ambient temperatures after a period of time can have increased levels of bacteria in them.

**Storage of Packed Lunches**
The school will provide storage area / facilities for packed lunch bags, in the most convenient and appropriate place possible. However the school cannot provide cooled storage areas and therefore cannot take legal responsibility for foods prepared at home and then brought into school.

**Dining Facilities for Pupils Bringing Packed Lunch**
The school will provide an appropriate area where pupils who choose to bring packed lunches can eat.

**Monitoring and Evaluation**
The school will carry out monitoring of packed lunch provision - where there may be concerns over a child’s food / nutrition intake and / or content of packed lunches, this can be dealt with timely and sensitively.

OfSTED are required to report on how the school promotes the personal development and wellbeing of all pupils – this may include food provision including packed lunches brought into school.

The Local Authority will work with the school to review packed lunch provision and will provide advice and support to members of the school community.

National Healthy School Programme (NHSP):
In order to achieve National Healthy Schools Status, schools are required to:
- “ensure healthier food and drink options are available and promoted in breakfast clubs, at break and at lunchtimes – as outlined by Food in Schools guidance”
- “monitors pupils’ menus and food choices to inform policy development and provision”

Schools that have achieved National Healthy School Status (NHSS) may be monitored as part of a national and local quality assurance process.

**Policy Review**
This policy will be reviewed as part of the schools agreed policy review process. In addition any major legislative or governmental changes regarding school food may lead to this policy being amended.

**Endorsement**
The School Governing Body, Pupils, Parent / Carer Representative and Staff endorse this policy for implementation.

Signed:  **RBrannan**

Date:  **June 2015**
